

# A simple API integration to move your organization

Connect Uber's technology with your existing software through our API. Automatically arrange real-time and scheduled rides for those you care for.

## Access to scale

Tap into Uber's global network of more than 3 million drivers to provide reliable rides everywhere your business moves.\*

## Real-time rides

Bring the power of Uber's platform—10,000 rides per minute—directly into your organization's software for a seamless interface.

## Freedom to innovate

Control every aspect of the end-to-end flow to create unique experiences that are tailored to your specific business needs.

## HIPAA-secure environment

Trust in APIs that were designed for healthcare from the ground up, with a foundation built on HIPAA requirements, to safeguard ePHI when coordinating rides.

Uber Health

# Public APIs to drive innovation forward

## Features designed to move care

### Flexible ride scheduling

Use the integration to request on-demand rides within minutes, schedule rides in advance, or give riders the flexibility to confirm and request when they're ready to ride.

### Transparent, efficient pricing

Only cover the cost of the ride—with no additional hidden fees or expensive overhead pricing. Get an estimate before you request and a report of the exact amount afterward.

### HIPAA-trained innovators

Partner with Uber Health's dedicated engineers, who are continuously building solutions designed to support your HIPAA compliance programs, making upgrades simple for your business.

## Ways to use our APIs

### Improving access through interoperability

Enable those who depend on your service for patient management to schedule a ride with Uber directly through the electronic health record (EHR), seamlessly connecting the tools and data.

### Partnering to unlock more scale for more choice

Connect with top non-emergency medical transportation (NEMT) brokers to bring Uber's vast scale to existing networks for an unmatched level of access to millions.

### Creating customized, accessible experiences

Find innovative ways to make more modes of transportation more accessible and affordable across healthcare, such as wheelchair-accessible vehicles or a door-to-door option.

You've got drive. We've got rides. Learn more at [uberhealth.com](https://uberhealth.com)
