The future of travel starts today

How Uber for Business is changing travel's status quo

Efficiency
Remove the booking and expensing processes for rides and save your employees countless hours of operational tasks.

Visibility
Gain insights and detailed reporting to help monitor usage and compliance, and get enhanced visibility into business trips.

Global consistency
Employees get a consistent experience in more than 600 cities and 75 countries around the world. One global app. No language barriers. No currency issues.

Automation
Link to your existing employee management systems for real-time employee syncing and permissions.

Control
Configure set-and-forget policies to make sure business Uber usage complies with travel policies and rules.

Trust
Partner with a tech company building technology to help improve safety in new ways.

Simplified management

Technology that automates employee management, onboarding, and compliance

Custom permissions

Configure custom policies to decide when, where, and in what type of vehicles your teams can ride, and how much they can spend.

Automated compliance

If an employee tries to take an out-of-policy ride, Uber in-app guardrails let them know and prompt them to switch to a personal payment method.

Automated employee management

Link Uber for Business into your existing employee management systems for automated employee roster syncing and permissions.

Built-in trip review

See aggregated work trips and request more information where necessary, all right from your dashboard.

Data-rich reporting

A new layer of visibility into business ground transport

Detailed trip dashboard

With the Uber for Business dashboard, see at a glance the time, date, and start and end points of trips taken on your business account.

Automatic receipt forwarding

For additional visibility, enable admins to get notifications as soon as a trip is complete.

Custom reports and exports

Exportable data and custom reports deliver actionable insights to guide travel program decisions and identify areas of additional savings.

Monthly savings reports

See your organization's Uber usage, and see how your organization is saving.

Usage and adoption reports

Easily track who has linked their Uber account for work trips, and see Uber adoption throughout your business.
Integrated billing

Create a seamless experience through automated billing, reconciliation, and invoicing

**Automated reconciliation**
Enable automated billing and reconciliation without the lag of expense processes or manual review.

**Custom expense codes**
Ensure that trips are correctly coded for reconciliation and accounting before a trip is taken.

**Centralized payment**
Pay for all of your organization’s business Uber trips with one payment method, on a per-trip or monthly basis.

**Monthly trip statements**
Simplify paperwork with monthly reports showing you all your Uber trips in one place.

Business-grade support

More than just powerful technology—get the right support when you need it

**24/7 business support**
Uber for Business admins can access specialized business support teams around the clock.

**Incident Response Team**
Uber’s Incident Response Team (IRT) is in place for all Uber users to quickly respond to the most urgent issues.

**In-app help**
All riders with an Uber account already have access to 24/7 in-app support, including a dedicated team for any critical situations.

**Enterprise support**
Quarterly business reviews and implementation support are available to larger clients.
A better employee experience

Save your teams time and hassle when they’re on the road for work

Expense-free trips
Eliminate the need to expense Uber trips by connecting their business accounts to your expense provider, while you gain more detail in the Uber for Business dashboard.

Always in-policy
In-app notifications let your travelers know when a trip is out of policy so they don’t have to worry about compliance while they’re on the road.

Consistent global experience
Give your travelers the same experience in more than 600 cities and 75 countries around the world. No language barriers. No currency issues.

More work, less worry
Help your teams eliminate the need to pre-book rides, pick up rental cars, wait in taxi lines, or find parking when rushing to meetings.
A spotlight on safety

Uber teams across the globe are working to continuously improve our technologies, policies, and practices, working in tandem with local law enforcement and government agencies.

Know that when your employees ride with Uber:

- All Uber trips are GPS-tracked from start to finish.
- All drivers must maintain a minimum rating from riders to remain active on the platform.
- Every passenger trip on the Uber app is insured.
- All vehicles available on the Uber app must meet minimum age and feature requirements.
- All drivers are screened before they can begin using Uber and re-screened periodically after that.
- Uber provides 24-hour support for all situations, including a dedicated 24-hour team for critical situations.

For more information on Uber’s safety features and standards, visit uber.com/safety.

1 In New York City, background checks, including reruns, are managed by the Taxi and Limousine Commission and not by Uber.
2 Vehicle requirements vary by region in accordance with applicable local rideshare requirements.
Supporting your duty of care

Uber for Business includes features to help you meet your company’s duty of care obligations for employees traveling for work.

Enhanced visibility

With the Uber for Business dashboard, see at a glance the time, date, and start and end point of trips taken on your business account.

Business support

All riders with an Uber account have access to 24/7 in-app support, including a dedicated team for any critical situations. Uber for Business admins can also access our specialized business support team.

Uber for Business and International SOS

When you choose the Uber for Business with International SOS integration, your organization will have additional access to important location and safety information, when you need it the most, in order to take action in critical situations.

The International SOS TravelTracker solution gives administrators a dashboard view of their travelers, broken down into locations with current medical or security alerts, and high-risk countries.

The TravelTracker integration allows Uber for Business to push more real-time datapoints, including such information as the employee’s last-known Uber dropoff location made when using the Uber for Business account.
Get your business moving with Uber.
