

# Extend your service door-to-door by arranging rides →

Enhance your customers' experience with your business by requesting a ride with Uber to get them where they need to go.

## White-glove service

Offer a ride to and from your business as an extension of your customer service. Request an on-demand, reliable ride whenever customers need it.

## Cost-effective rides

Reduce your transportation costs by paying only for the rides you need, when you use them. No overhead shuttle costs or vehicle maintenance fees.

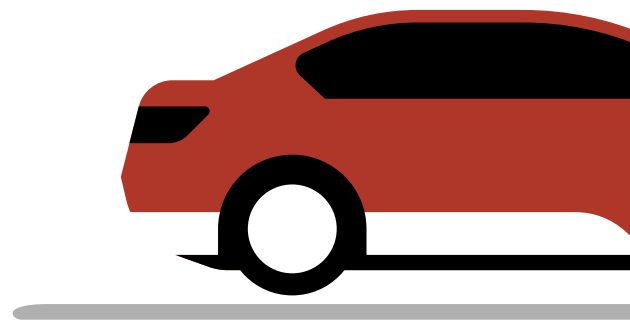

## Real-time visibility

Manage your customers' experience end to end by seeing exactly where they are and when their ride will arrive.

# Get your customers where they need to go →

## High-quality service

### Improve customer satisfaction

Delight your guests, clients, and customers by providing a reliable ride at any time and on any day of the year.

### Offer a seamless experience

Manage everything on your guest's behalf—they don't need a smartphone or the app. All details are sent via SMS once the ride is scheduled.

### Tailor to their needs

Arrange rides for your customers in multiple ways: request for now or later for the rider, or let them initiate the request once they're ready to go.

## Easy to coordinate

### Focus on your business, not rides

Reduce the burden on your operational teams and drive down overhead costs associated with providing taxis, rentals, or shuttle services.

### Manage transportation with ease

Coordinate multiple rides from one centralized web dashboard. It's easy to book, reschedule, and get real-time status updates of where each rider and driver is.

### Monitor the impact on your business

All details are collected in your Uber for Business dashboard, so you can keep track of transportation costs, usage, and trends around your business.
