Provide Rides for Patients with Uber Health.

Get patients and caregivers on the road to care using the Uber Health dashboard. Schedule reliable, comfortable rides for those who need it most.

HIPAA Compliant

Patient privacy is protected before, during, and after each trip when you coordinate patient rides to and from your organization.

Cost Effective

Reduce your transportation costs and increase your operational efficiency by helping patients get to their appointments on time, for less.

Reliable Rides

Use the familiar on-demand Uber experience to provide comfortable rides for your patients when they need them.

Making the Road to Care Easier, Together.

Easy for Patients.

A Better Patient Experience
Create a sense of comfort. Patients will know when their ride is coming and the route they will be taking to get where they need to go.

Seamless Coordination
Handle all of the scheduling on behalf of patients through a web dashboard. No need for a smartphone or access to the Uber app—all trip details are sent through a text message.

On-demand Rides
Patients are less likely to miss an appointment due to lack of transportation. An Uber can be there in minutes to get patients on the road to care.

Ongoing Support
We provide the education and tools needed to make the experience easier for those new to Uber. When needed, support is available through a dedicated HIPAA-trained team.

Easy for You.

Flexible Ride Scheduling
Arrange rides for immediate pickup or up to 30 days in advance, so managing transportation for patients works with your organization’s workflow.

Track and Manage Automatically
Coordinate multiple rides with ease from the web dashboard. It’s easy to book, reschedule, and get a clear overview of where each rider and driver is with real-time trip status.

Efficient, Transparent Pricing
No hidden fees or expensive overhead costs. Your patients get a ride when they need one and your organization pays the same price that everyday Uber riders pay per ride.

Centralized Billing
Keep track of what you’re spending on patient transportation with ease. All trip details are collected in your Uber Health dashboard and payment is made easy through one monthly statement.
