Request Ride

Hi Mary, your Uber ride from Medical Center is scheduled for 9:00am, October 2

Compliance with HIPAA

Ensure that your patients' information is protected while coordinating rides to and from care on their behalf.

Cost-effective transportation

Reduce your transportation costs and increase your operational efficiency by helping patients get to their appointments on time, for less.*
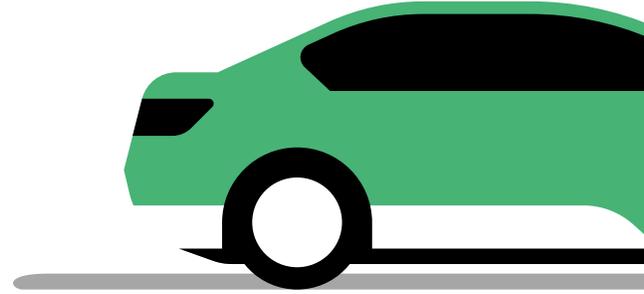

On-demand, reliable rides

Remove barriers to care by using the reliable, on-demand Uber experience that doesn't require the Uber app or even a smartphone.

*Uber Health costs less than most traditional non-emergency medical transportation options.

Uber Health

Making the road to care easier, together →

Easy for patients

Better experiences

Create a sense of comfort. Patients will know when their ride is coming and who will be driving them there, even if they don't have the app or a smartphone.

Multiple ways to ride

Patients are less likely to miss an appointment if they have access to reliable transportation. A ride with Uber can be there in minutes or scheduled in advance to get them on the road to care.

Seamless coordination

Handle all the scheduling on behalf of patients through a web-based dashboard, and select the type of ride, including wheelchair-accessible vehicles or extra assistance where available.

Easy to coordinate

Flexibility and support

Arrange rides for immediate pickup or in advance. When needed, support is available through a dedicated HIPAA-trained team.

Transparent pricing

Your organization pays the cost of the ride—with no additional fees or expensive overhead costs for using the Uber Health platform.

Unified dashboard

Coordinate multiple rides with ease from one place. All trip details are collected and payment is simple with one monthly statement.
